

Weekly Construction Summary

Week of 05/12/2024

Construction Summary

The weather forecast was marginal for the whole week. Decision to work was made on a day-to-day basis.

On Monday (5/13), the right-side wall was demolished except for the structural ring and the cylinder shaft.

On Tuesday (5/14), the demolished material was removed from the site. Rising wind prevented additional demolition.

On Wednesday (5/15), demolition continued in the morning, but was stopped in the afternoon due to rising wind. The back wall and part of the left-side wall were taken down to the top of the first level.

On Thursday (5/16), the demolished metal material was removed from the site. The wind was too strong for removing non-metal material or for continued demolition.

On Friday (5/17), the wind was still too strong for removing non-metal material or for continued demolition. The site was secured for the weekend.

Daily reports attached.

INDEPENDENT DECOMMISSIONING PROJECT MANAGER PROJECT DIARY

DATE : Monday, May 13, 2024

WEATHER: Suitable for all Planned Work

PROJECT TITLE: **Caltech Submillimeter Observatory Decommissioning**

Work Hours:

At CSO, partly cloudy, light wind. Temp at 0930am 35F. Increasing cloudiness through the day. Fog and light rain after 1300.

Report By: **Shawn Gardner**

Arrv: **0930**

Dep: **1500**

Monitors on Site:	Cultural - Gerard Mahi
Work Items	Location & Description of Work/Activities
Demolition	Morning meeting was at 0830 due to crews flying in from Oahu. Summit weather forecast showed marginal weather for the week, with good chance of fog and precipitation at the summit, and moderate winds. Decision was made to proceed with the work on a day-by-day basis. Personnel arrived at the CSO between 0930 and 1000. Demolition work began at 1020. The dome was rotated ~90 degrees so the side faced the parking area, and the work began with stripping the aluminum shell. When that was done, the steel structure was removed. When the demo got down to the second level where there were gypsum board walls remaining, the water truck came on the site and applied water as needed for dust control. Demo stopped for the day at 1340, with only the ring beam and shutter cylinder shaft remaining of that side. Cleanup started with moving all of the demoed material to the center pit of the dome, and then the cleaning of the surrounding area. The cleanup was completed and all personnel left the site by 1510.

Demolition	<p>Morning meeting was at 0800 due to road closure due to icy conditions.</p> <p>Personnel arrived at the CSO between 0900 and 0930. Five DeLuz haul trucks left the Visitor Center at 0930. The first arrived at CSO at 0950, the last at 1030. The trucks were loaded with previously demoed material through the rest of the morning. They departed the site at 1155 as a convoy. Demolition work resumed at 1200, but the wind started picking up and demo stopped at 1245. The dome was rotated so the back wall faced the wind, and site cleanup began.</p> <p>The cleanup was completed and all personnel left the site by 1400.</p>

INDEPENDENT DECOMMISSIONING PROJECT MANAGER PROJECT DIARY

DATE : Wednesday, May 15, 2024

WEATHER: Suitable for all Planned Work
At CSO, clear, light to moderate wind.
Temp at 8am 35F. Increasing and
variable wind in the afternoon.

PROJECT TITLE: **Caltech Submillimeter Observatory Decommissioning**

Work Hours:

Arrv: **0800**

Dep: **1400**

Report By: **Shawn Gardner**

Monitors on Site:	Cultural - Ron Mitchell
Work Items	Location & Description of Work/Activities
Demolition	<p>Personnel arrived at the CSO between 0745 and 0800. Demolition work started at 0815. The wind started picking up and at 0915 the dome was rotated so the back wall acted as a windbreak, and then work continued. At 0940, one of the flexible hydraulic lines between the boom and the shears attachment snagged on protruding steel and was damaged. The fine spray of oil was noted by the operator and the machine was shut down immediately. The damaged line was replaced and work resumed by 1000. All the leaked oil was within the dome.</p> <p>At 1220, demo work was stopped due to the rising wind, and final cleanup commenced. The back and side walls had been taken down to the first level, with the first level outside walls left in place to act as a wind break for the demoed material piled in the center of the remaining structure.</p> <p>The cleanup was completed and all personnel left the site by 1400.</p>

WEATHER: Marginal for all Planned Work

PROJECT TITLE: **Caltech Submillimeter Observatory Decommissioning**

Work Hours:

At CSO, foggy, variable moderate to strong wind. Temp at 8am 35F. Stayed similar throughout the day.

Arrv: **0800**

Report By: **Shawn Gardner**

Dep: **1300**

Monitors on Site:	Cultural - Ron Mitchell
Work Items	Location & Description of Work/Activities
Demolition	<p>Personnel arrived at the CSO between 0800 and 0900. The first three haul trucks arrived between 0845 and 0900. The fourth and fifth arrived at 1000.</p> <p>Due to concern about the windy conditions, truck loading did not start right away. Jon Steen arrived at the site at 1000, and made the decision to start loading, noting that if material started blowing around, the work would stop and the trucks would be sent off empty.</p> <p>Loading started with metal materials, and there was not an unamanagable amount of material being blown, and so loading continued. Cleanup was continuous, with personnel using shop vacs and hand vacs to collect the small amount of windblown material generated.</p> <p>Four trucks were loaded with metal materials. The fifth truck was left empty because there was no more metal material, and loading non-metal material was deemed too risky with the continuing windy condition. The trucks left in a convoy at 1220, and final cleanup commenced.</p> <p>The cleanup was completed and all personnel left the site by 1300.</p> <p>M3 team visited the site at ~0900, and again at ~1200, for about an hour each.</p> <p>David Ariaanse, Nancy Valenzuela, Eric Grigel, Grecia Falcon</p>

INDEPENDENT DECOMMISSIONING PROJECT MANAGER PROJECT DIARY

DATE : Friday, May 17, 2024

WEATHER: too windy for Planned Work
At CSO, foggy, variable moderate to
strong gusty wind. Temp at 8am 35F.

PROJECT TITLE: **Caltech Submillimeter Observatory Decommissioning**

Work Hours:

Report By: **Shawn Gardner**

Arrv: **0730**

Dep: **0830**

Monitors on Site:	Cultural - Ron Mitchell
Work Items	Location & Description of Work/Activities
Demolition	Personnel arrived at the CSO between 0730 and 0800. Weather conditions were deemed too windy to load the remaining material onto trucks, or to continue demolition. The remaining demoed material was covered and weighted down to secure the site for the weekend. The cleanup was completed and all personnel left the site by 0830.
